Caring technologies
- Care Infusion Covers: With Empty Indicator
- Conditioning ingredients: Blend of rich oils & Vitamin E

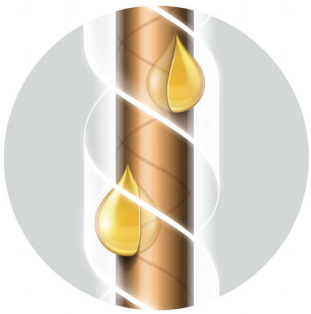
Technical specifications
- For ActiveProtect stylers only: HP8383 and HP8382

Highlights

Conditioning ingredients

The conditioning ingredients released by the Care Infusion Covers (Argan oil, Camellia oil, Avocado oil and Vitamin E) are activated by the heat from the straightener. This noticeably increases softness and shine* as well as preserving strength. *Tested on 60 women in France, 2013.

Heat protection of each strand



The innovative Care Infusion Covers create a protective shield against heat damage while straightening. They have been designed to last for approximately a month**. **Average straightener use, 10 uses.

Care Infusion covers

The Care Infusion covers are easy to put in place. They are built on innovative technology, combining knowledge of hair and material properties. The heat of the straightener will activate the covers, releasing ingredients. Thanks to the natural straightening motion, the conditioning ingredients will be applied to the hair. The decoration on the covers is an Empty Indicator. Once it has faded away, the covers need to be replaced (in average a month or 10 applications).
